

MOLEY® - PIC

Automatic Roll Slitting Machine

MOLEY®-PIC LIN 450/600

With MOLEY® it's always a premium cut!

MOLEY®-PIC

„The Wee one“ in the series of MOLEY® roll slitting machines.

Designed for cutting small rolls of soft wound (“displaceable”) materials (adhesive tapes, insulation tapes, self-adhesive deco-foils, embossed foils, etc.).

With the same technical features as the MOLEY®-Standard it has all the advantages of a "big" roll slitter.

Available in standard or linear construction with different tool options (stiletto type knife or fixed, conveyor type or driven circular blade).

The machine is equally suitable for industrial production as well as for sporadic use for small quantities - ideal for model building.

Different model variations in space-saving design allow maximum production capacity in minimum space.

- Electrics according to Euronorm EN 60204/1
- Programmable Logical Control - Type Siemens S7
- Construction/execution conforming to Eurostandard “CE”
- Cutting tools compatible within entire MOLEY® range
- Working width: 600 to 1600 mm - as required
- Max. roll diameter to be cut: 200 mm (assuming core Ø; 50 mm)
- Dimensions (approx - for working width 600 mm):
length 1,50 x width (depth) 1,00 x height 1,30 m - Weight: ca. 400 kg
- Operating voltage: 400 V - 3 PE - 50 Hz – 16 A
compressed air: 6-7 bar
