

Roller Press ROLLOPRESS

ROLLOPRESS KM 600 - Roller Press

ROLLOPRESS

Roller press for punching, cutting out or laminating - especially suitable for small runs.

Flexible and versatile - suitable for punching various materials (cardboard, smooth plastic parts, leather, etc.), the cutting-out of vacuum molded and air blown parts as well as for laminating. All commonly known strip steel blades can be used.

Technical equipment available in various executions and machine in different working widths (from 600 mm up).

Simple, efficient operation - recommended as a cost-effective solution especially for small production quantities.

- Electrical equipment according to Eurostandard EN 60204/1
- Design / manufacture according to Eurostandard "CE"
- Standard with decorative wooden tables (both sides), special version of the punching surface possible
- Suitable for all common strip steel blades
- Punching method "sandwich" style (with punching counter plate)
- Material passage height adjustable from 0-150 mm (max. 300 mm)
- Feeding by hand
- Throughput speed 20 m/min
- Working width: 595 - 1795 mm in steps of 100 mm
- Dimensions (approx. type 600 KM = max. working width 595 mm)
Length 2500 mm x width (depth) 900 mm x height 950 mm
- Weight ca. 450 kg
- Electrical connection: 400 V - 3 PE - 50 Hz - 16 A
